The big question: Who should you partner with?

3 Reasons Your Business Needs Micro Influencers

Forbes

15 Big Benefits Of Working With Microinfluencers (And How To Engage Them)

How to Make Millions with Macro Influencers

What Is a Micro-Influencer? 7 Benefits They Offer Your Brand (+ Examples)

In the quest for scale, brands are turning towards macro-influencers

Data

From the Discover page of TikTok...

- All hashtags from Oct 2020 to Apr 2021 (200+ in total with 30 campaign hashtags)
- All videos posted under each hashtags (0.5M+ in total)
- All tracked from their introduction to maturity (day 0 followers & day 14 impressions)

Thinking "Causally"

Focal question: How does popularity drive impressions?

- May be nonlinear
- May depend on content
- Content is also a confounder
- There may be other unobserved confounders (e.g., cross - posting)

Representation Learning

In short: a statistical representation of content

Deriving a new KPI: Follower Elasticity

Content Representations + Machine learning model (Deep Instrumental Variables)

1% change in # follower $s \rightarrow x\%$ change in # impressions

Follower Elasticity of Impression s (FEI)

Key Findings

Wharton UNIVERSITY OF PENNSYLVANIA

Key Findings

Average FEI by Engagement Tactic

Optimizing Influencer Campaigns

Implications for Practice

- Main takeaway: FEI, a tool in the toolkit
- Returns to popularity aren't linear: you might be paying for the wrong reasons!
- Everything depends on content and goals
